MEMORANDUM FOR : Deputy Director, Plans

SUBJECT : Pilot Protective System - GUSTO

25X1A

1. [REDACTED] requested that this explanatory note be forwarded to you. The subject of the pilot protective equipment for Project GUSTO was, as I understand, brought up in February in a conversation between yourself, Gen. Flickinger and Col. Burke.

25X1A

2. It was at that time Gen. Flickinger's intent to bring [REDACTED] into the program in order that [REDACTED] might undertake any necessary developmental studies. It is my understanding that this was agreed to by all concerned and shortly thereafter [REDACTED] and Col. Burke discussed the desirability of undertaking an initial four-month study by the Firewel Corp. with an anticipated expenditure of approximately \$10,000 per month. Col. Burke obtained your verbal approval for this effort.

25X1A

2. 3. [REDACTED] has since been in discussion with personnel of Firewel Corp. and also Convair and Lockheed. We have since received a firm proposal from Firewel to undertake a four-month study at a total cost of \$53,495.04. A firm item in GUSTO Program Approval Revision No. 1, in the amount of \$55,000, has been set up in order to cover the Firewel study. The technical content of the Firewel proposal was satisfactory to [REDACTED]

25X1A

4. Since the subject matter of the attached Program Approval, GUS-0172, has been covered in Amendment No. 1 to GUSTO Program Approval, GUS-0206, request for approval of this single item can be withdrawn. In the negotiation of a contract with Firewel, two items appear to require attention specifically:

*Agree
PMB*

a. The contractual coverage should begin as of 1 March rather than the 1 February date requested in the Firewel letter of 26 March.

SECRET

25X1A

b. The [redacted] profit rate included in the Firewall cost estimate may be slightly excessive.

5. With your approval the contractual negotiations will include suitable resolutions of these two points.
